To whom it may concern

We are searching for partner schools in the Baltic countries with students aged 15–19 years who would like to cooperate continually on various projects, e.g.:

- Virtual communication in English between the students on subjects related to history, society and politics
- School visits and perhaps home-stays: We would like to come visit your school and maybe the homes of the students and we would welcome you for a visit in Denmark (possibly with support of the EU Erasmus+ Programme)

About us:

Herning Gymnasium is situated in Herning, a city with 40.000 residents in the western part of Denmark, a one-hour drive from the airport of Billund and a 4-hour drive from Copenhagen.

Herning Gymnasium was founded in 1923, which means that we have a long history and many traditions while at the same time being open to new ideas and changes. Now, Herning Gymnasium has more than a 1000 students, 100 teachers and other staff members.

Herning Gymnasium is an upper secondary education for boys and girls aged 16-19 years. The school offers different branches of study. The four main branches are language, science, social science and arts. The school is located in a very up-to-date building complex. Get an impression of our school [here](#).

Herning Gymnasium has a strong international profile, and we already have partner schools in Brest, France, and Ohio and North Carolina, USA.

We are convinced that international contacts between schools is a great opportunity for the students in both countries to practice language skills, broaden minds and get a deeper understanding of different cultures.

We are especially interested in partner schools in the Baltic countries because of the historical and cultural connections between our countries.

Deadline for expression of interest: January 1st 2016
