

Potential partner in the frame of Interreg Europe programme:
Bistrita Municipality, Romania

We are a city of about 75.000 inhabitants in the northern part of Transylvania, Romania.

We have some experience in implementing European project as we already been part of two Interreg IV C projects dealing with innovation in the crafts sector and energy efficiency.

Therefore, we are very interested and willing to be part of projects in the frame of Interreg Europe programme especially in those dealing with the following thematic:

- improving investment of green infrastructure
- Innovation in the preparation, implementation, evaluation and monitoring of sustainable urban mobility plans
- improving the SEAPs implementation (the city of Bistrita is member of Energy Cities and signatory of the Covenant of Mayors)
- reducing the carbon footprint in the public buildings
