The COMMUNITY is one of the leaders of decentralizations in Ukraine.

ADVANTAGES OF DECENTRALIZATIONS:

- independence of local self-government bodies in the exercise of powers
- concentration of financial resources in the community
- bringing the government closer to the people
- ensuring the availability of administrative services

KOROP MUNICIPALITY
Chernihiv region

The community was formed on September 9, 2016

Its administrative center - the town of Korop - was founded in 1153

Since the beginning of the full-scale invasion, the community has become the second home for more than 2,000 IDPs. Our task is to provide people with proper conditions

A dormitory for IDPs was created for 32 places

Organized hot meals for residents in need (including IDPs)

IDPs receive charitable assistance (in particular, through a division of the Red Cross Society)

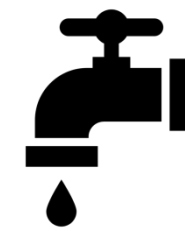

In a communal hotel for free lived 545 IDPs

Expanded work of 9 points of indomitability (where in the event of a power outage you can charge your phone, drink tea, have a snack, etc.)

RESTORATION OF THE WATER SUPPLY SYSTEM. INTRODUCTION OF SEPARATE COLLECTION AND SORTING OF GARBAGE

- The municipal company "Voda" works in the community.
- The length of the water supply network is 16.8 km, the number of subscribers is 670. There are 3 settlements served.
- Over the past 2 years, 1.5 km of water pipe have been replaced
The company is equipped with the necessary equipment to improve its work

- The development of a separate garbage collection program has begun.
- With the support of a public organization, purchasing waste containers, a press-compactor were obtained;
- Educational events are held with children to popularize separate garbage collection

PROSPECTS OF THE MANUFACTURE OF BUILDING MATERIALS AND WOOD PROCESSING

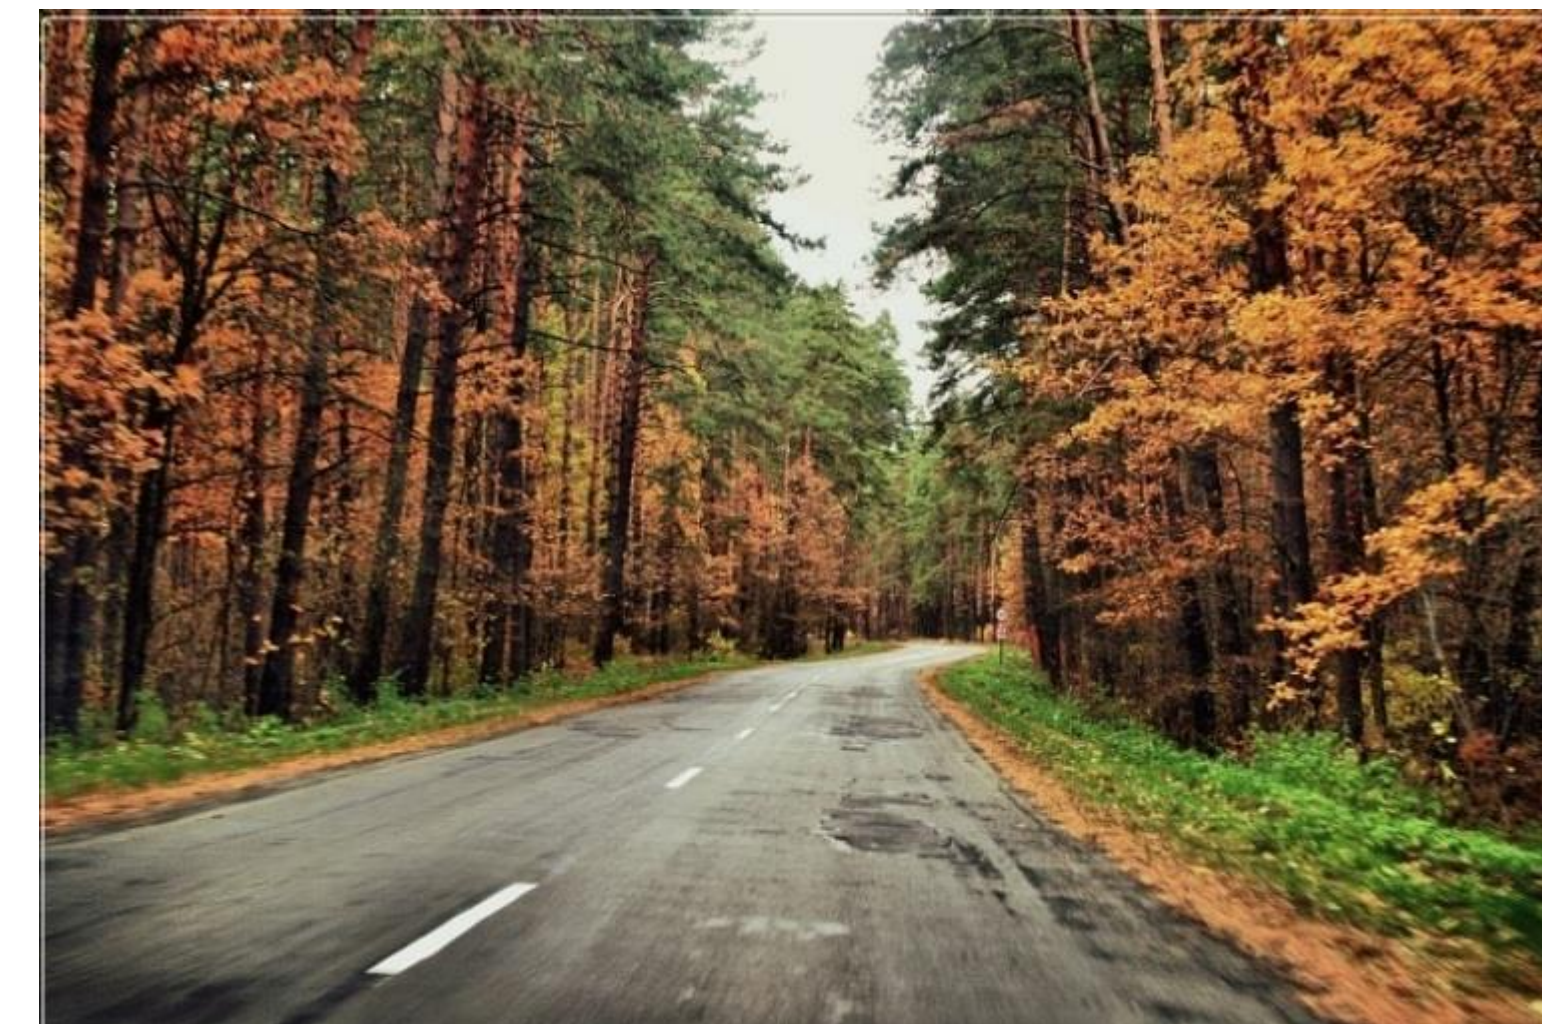

The municipal company "Agrolishosp" works in the Korop region.

It uses more than 11,000 hectares of woods

Production waste per year: sawdust - 2305 m³

business machine - 514 m³

wood mill - 3227 m³

KOROP MUNICIPALITY
Chernihiv region

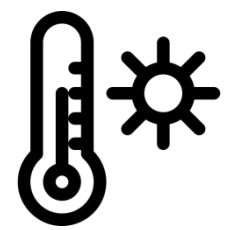

RECOVERY NEEDS

The war destroyed our community's plans for development and changed priorities.

Assistance of the Armed Forces, the safety of the population of the community, support of internally displaced persons, social protection of citizens — in the first place.

At the same time, we urgently need the implementation of a number of projects necessary for the stable life of our community:

WARM

89 buildings are communally owned by the municipality. Part of it needs modernization of heating systems, replacement of boilers with energy-efficient ones

STREET LIGHTING

Additional equipment is required to provide utility services of appropriate quality (in particular, an auto-hydraulic lift)

HANDLING WITH WASTE

Korop community became on the path of implementing separate garbage collection. Another serious step is the arrangement of the landfill for solid household waste
