

Development cooperation and education seminar "Tell me your story..."

Working languages: Latvian, English and Russian (simultaneous interpretation)

17 December 2021
09:00 – 13:00 (CET)

Ogre Central library, Brīvības iela 35, Ogre
Zoom platform

In the beginning was the word. Words are making sentences, forming stories we can share with others and creating a new meaning, new vision through story telling! We need to tell stories, as it is in our nature. But the most important: the idea of story and storytelling is to celebrate life!

However, for the story to become reality, we need funding. The European Commission's two key priorities are green and digital Europe to foster changes starting from reducing the impact of climate change and continuing with digital transformation in education. During the seminar we will offer an insight into several new funding opportunities and calls for proposals, which might help to make your story, wish or idea to be implemented in the real world. Moreover, this can be done together in a sustainable and beautiful way.

Likewise, the two parts of the event will be an opportunity for the municipalities from the European Union and Eastern Partnership countries to share with the best practice examples of development cooperation activities implemented in the fields of climate action and global citizenship education. We aim to spotlight the activities already implemented, so that this could form the basis for the future stories (ideas and visions) and new future project ideas and common activities among the European Union and Eastern Partnership countries' municipalities.

If you wish to be part of this storytelling experience, please, **register until 16 December:**
